Forecast for Saturday 11 Mar 2023

Weather: Clear spells overnight with a widespread frost. Dry with bright spells in the morning but clouding over by the afternoon. Outbreaks of snow will arrive from the west around early afternoon, turning heavy and persistent with blizzards on the tops for a couple of hours. Snow turning to rain through the evening as milder air arrives from the southwest.

Chance of cloud-free hill tops above 800m: 95% overnight and in the morning becoming effectively 0% in the afternoon.

Low Cloud and visibility: Excellent visibility during the morning. Deteriorating quite quickly in the afternoon, becoming very poor in snow with extensive cloud and fog developing down to low slopes. Blizzards for a couple of hours on the tops before it turns to rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Clear weather in the morning but conditions will deteriorate quite quickly in the afternoon. Good route planning will be required with possibly an early start to avoid the difficult or hazardous conditions in the afternoon and evening.

Forecast for Sunday 12 Mar 2023

Weather: Outbreaks of rain or drizzle clearing overnight. A dry and bright morning and feeling much milder than of late. Outbreaks of rain arriving in the afternoon, turning heavy and persistent in the evening accompanied by strong southwesterly winds. Thawing snow and slush giving heavy and slippery underfoot conditions.

Maximum wind: South or Southwest 25mph gusts 35mph, increasing to 35 to 40mph with gusts of 50 to 60mph on the high tops and ridges.

Chance of cloud-free hill tops above 800m: 10% overnight improving to 60% by the morning, becoming less than 10% from around mid-afternoon.

Low Cloud and visibility: Extensive cloud and fog overnight becoming patchy and lifting to 700m in the morning. Deteriorating in the afternoon, becoming poor in rain with extensive cloud developing, bases 300 to 500m.

Temperature: **Valleys:** Plus 8C rising to 11 or 12C.
At 800m: Plus 4 or 5C.
Freezing level: Above summits.
